

TRANSIT SHELTER

Existing Transit Shelters

Transit Shelter Concept | Clean contemporary look with metal and/or wood finishes

The transit elements make up a “kit of parts” which has the ability to:

- evoke the identity and contemporary character of the City Center
- be adapted and integrated at various sidewalk conditions
- be flexible for a wide range of users to maneuver around
- allow for the installation of signage, information displays, seating and trash receptacles

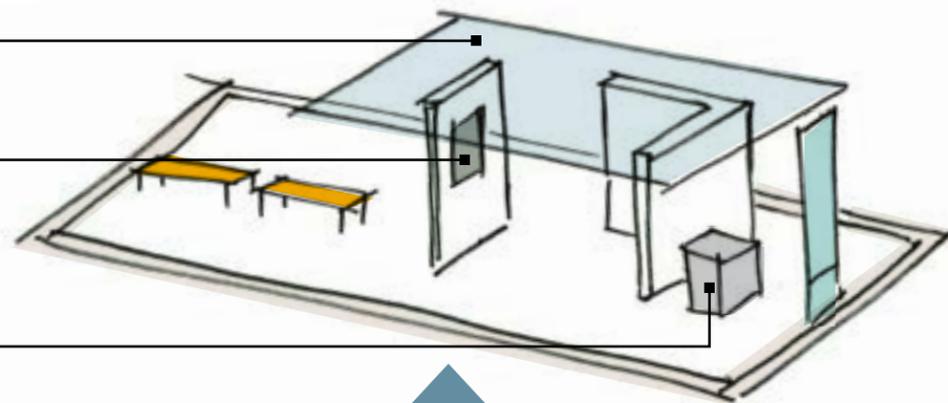

BASIC

FULL BUILD OUT OF PARTS

transparent cover with two or three vertical support walls

transit information display
vertical or horizontal mount
with graphics that reinforces
the City Center branding

trash receptacle

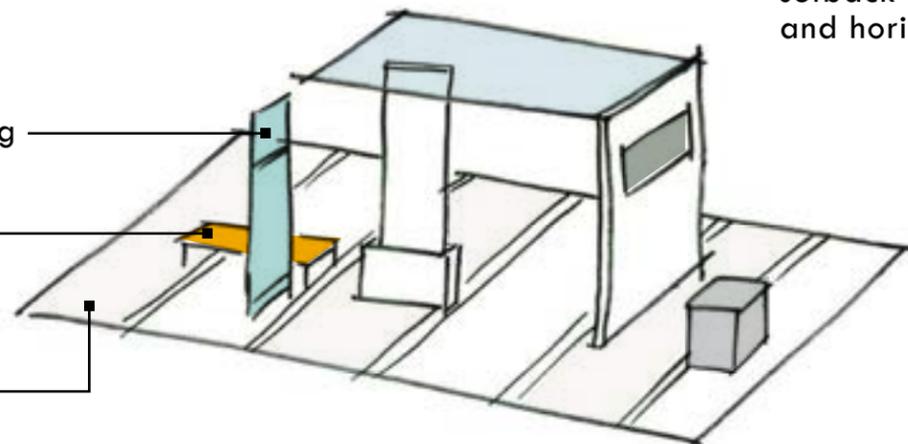

1'-6" W x 6" D x 10'-0" H

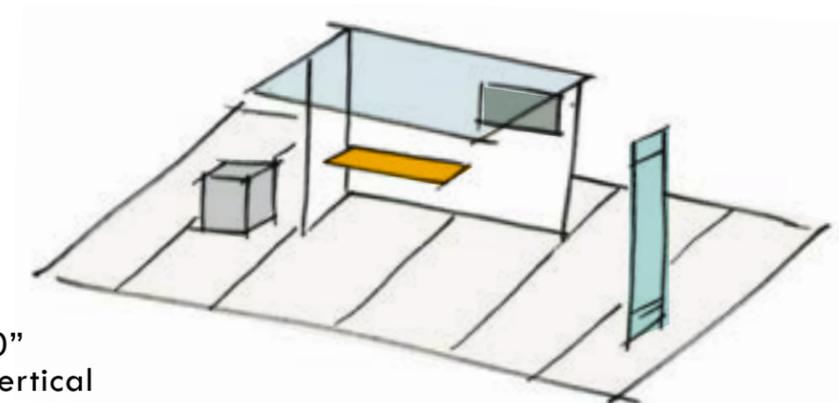

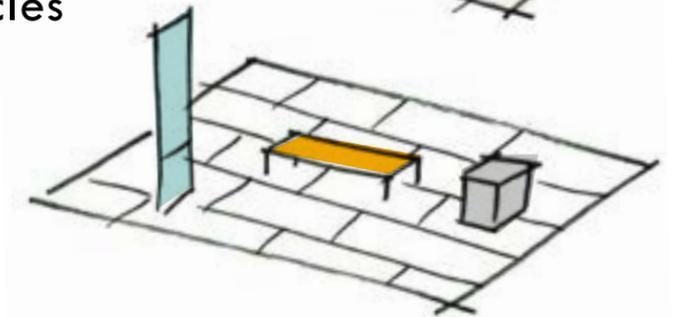

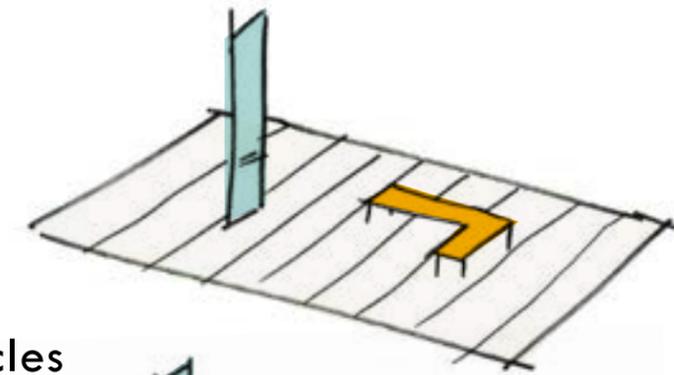

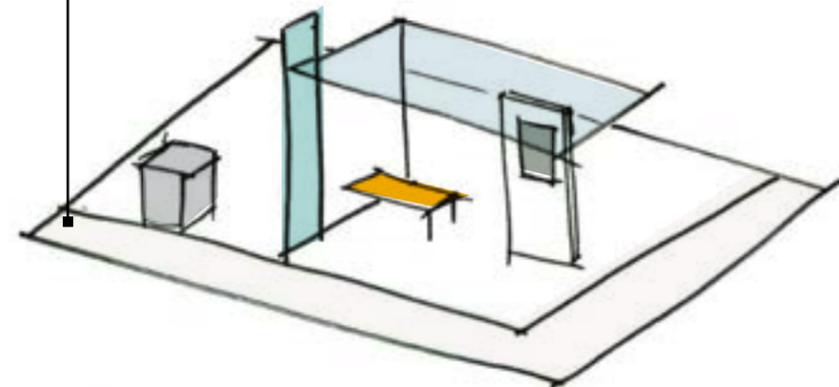

signage with graphics that
reinforces the City Center branding

off the shelf seating

pavement treatment to define
transit space and conceal
shelter foundation

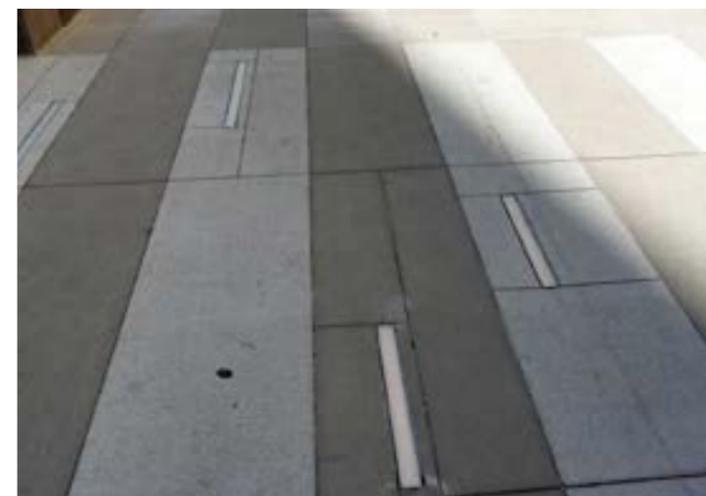

boarding area with 4'-0"
setback clearance for vertical
and horizontal elements
