

# ABOUT THE SOUTH LYNNWOOD NEIGHBORHOOD PLAN

## Background

South Lynnwood is a diverse residential and commercial neighborhood with 196th St. SW to the north, Highway 99 to the west, and I-5 and the shared boundary with Mountlake Terrace on the east and south. The 1.25 square mile neighborhood is within walking distance to the upcoming Lynnwood Link Light Rail (opening 2024), and is home to the Scriber Creek Corridor, South Lynnwood Park, wetlands, open space, and other natural areas.

## South Lynnwood Neighborhood Plan

South Lynnwood and the city-at-large are growing and changing. This Neighborhood Planning project aims to engage South Lynnwood's communities to establish a vision for the community; identify projects and policies to stabilize housing for all families; provide opportunities for various land uses; improve access to busses and non-motorized transportation; and be a model for other improvements throughout the City of Lynnwood.

This project began in June 2019 and is estimated to go through December 2020, resulting in a South Lynnwood Neighborhood Plan for implementation by the City of Lynnwood and community partners.

## Community Engagement

Your voice matters! To ensure that this Neighborhood Plan represents the voices and perspectives of South Lynnwood's many communities, we are engaging the larger community, including underrepresented individuals and businesses in the neighborhood to understand their goals and hopes for the future. We aim to share learnings from this project and strengthen partnerships between the community and the City of Lynnwood. We strive to build ownership and pride in this Neighborhood Plan, so that community members and the City can move this Plan forward together.

The Neighborhood Plan engagement team will be meeting with community groups throughout this project.
