Project Design Review Application

File Name:

File Number:

Project Design Review is required for multiple-family, commercial, industrial and other nonresidential projects. A Land Use Application for a Project Design Review is deemed complete when it is accompanied by the required items identified below. Please be advised that additional information may be required during the review process in order to respond to or resolve particular issues. No application shall be considered complete if any of the required information is missing. The Community Development Director may approve departures from the guidelines, pursuant to LMC Section 21.25.150, upon written request by the applicant and a finding that the proposal provides equivalent or superior results to the original guideline. The Community Development Director may waive any of these items, pursuant to LMC Section 1.35.015(A), upon written request by the applicant and a finding that the item is not necessary to review the application. Additional copies of certain items will be required later in the process.

NOTES

- The approval of a Project Design Review Application does not in any way replace, modify or waive any
 requirement for the compliance of the proposal with other applicable codes, standards, or regulations
 including, but not necessarily limited to, those of the Building, Fire or Public Works Departments. You are
 advised to contact these departments concerning such requirements.
- Design plans need to be developed to the point that compliance with decision criteria and guidelines are clearly evident.
- 3. Approval expires two years from the date of the final decision unless the applicant begins construction or submits to the city a complete building permit application for the proposed development (LMC 21.25.165). The Community Development Department Director may grant a single one-year extension to this time limit, provided a written request for an extension is received before expiration. The applicant must substantially complete construction for the development approved under Project Design Review and complete the applicable conditions listed in the decision within five years of the date of the final decision (LMC 21.25.165).

Project Design Review Application

- 3 -

DEVELOPMENT & BUSINESS SERVICES

- 4. It is the responsibility of the owners, applicants and agents to become aware of the requirements of Title 21-Zoning of the Lynnwood Municipal Code. It is strongly encouraged that a pre-application conference with the City staff be scheduled prior to submittal of an application.
- 5. An application may be amended only in writing.
- 6. Optional consolidated review: Per LMC 1.35.080, projects involving two or more land use applications filed at the same time may be "consolidated" upon written request by the applicant at the time of submittal. When applications are consolidated for review, the entire package will proceed using the process involving the highest decision-making authority. For example, for a project involving a Project Design Review application and a Rezone application, both applications would have a final decision issued by City Council. It is strongly recommended that you speak with a staff member about consolidated review so that you are informed of your options and how your applications would be affected.

I/We hereby request consolidated review.

- 7. Submittal of this application grants the appropriate city officials the right of entry to the project site during a reasonable hour and, upon proper identification, to the building, structure and/or premise, which is directly related to this application.
- 8. In each application the burden of proof rests with the applicant, petitioner or proponent.
- Items with any typewritten information must be 10-point font or larger to ensure legibility of scanned documents.

I/We		, owner(s) of the property
