**Subject:** City of Lynnwood funding for CAP

Hi Corbitt,

Thank you for the opportunity to offer some thoughts on the funding needs of the pre-construction program. Currently, the program is offered free to students which means there is no tuition to cover our costs. As you know the City of Edmonds has offered funding, but it has two key limitations:

- They require the student to live in a certain area of Edmonds.
- The funds are directly related to one individual.

These limitations make the funds almost unusable for our program. Because the funds are to a specific person they cannot be used to serve multiple individuals. Also, by linking it to one person, it could create a tax implication for the funded student.

If possible we would like to avoid these issues with the City of Lynnwood funding. It would be extremely helpful to have the flexibility to use the funds to cover class expenses, materials, equipment, tools and books. This would allow the funds to be used as needed to serve multiple students and the greater good.

Thank you again for the discussion and all your efforts in helping stand up this much needed program.

*Larry*
