Corbitt –

The suggestion came from the survey of the employees for return to work and the total I believe we requested was \$50K.

There is about \$20-25K in air duct cleaning that could be done (this is for City Hall and NAB only).

We could also install some air purifiers, or do cleaning in other buildings. This cost would need to be researched, but I believe we put in another \$25K for that option.

Marcie

**Subject:** American Rescue Plan Act funds

Some time ago, it was suggested that the City's ARPA funds be used to make HVAC improvements in City buildings to better protect occupants from COVID. Is this still a need? If so, what is a ball-park cost estimate?

Thanks. Corbitt
