

2017 Annual Automated Traffic Safety Camera Report

Lynnwood Police Department

Per RCW 46.63.170 cities using automated traffic safety cameras must post an annual report of the number of traffic accidents that occurred at each location where an automated traffic safety camera is located, as well as the number of notices of infraction issued for each camera on the City’s website. The below data comprises the number of accidents and citations issues at each respective intersection and school zone where traffic safety cameras are deployed.

*Number of Accidents reported reflect collisions occurring within the intersection. Prior year reports included accidents occurring upon approach, but not necessarily within, the intersection. Due to the subjectivity of what constitutes an accident occurring “upon approach” we will now only be tracking accidents within the intersection for the purposes of this report.

** School Zone speed camera was disabled in September due to construction of new school.
