

## Certified Backflow Assembly Tester List

The companies on this list should not be considered recommended by the City of Lynnwood. This is merely a list of companies who have a current City of Lynnwood business license and state certification to test and/or install backflow assemblies. Many plumbing and irrigation contractors listed in the phone book can provide certified backflow testing.

If you use a company not on the list or with expired information, the following information must be sent with the Test Report:

1. Current Validation card for BAT Tester
2. Certification of Calibration within one year of the testing date for Test Equipment used
3. Current City of Lynnwood Business License

Test reports will not be accepted without the above information on file. Certifications on file must be current with the year of testing.

|                                                                                      |                                                                      |                                                                                                                                                         |
