- 2. Equitable Access
- 3. Health
- 4. Environmental Resilience
- 5. Community Engagement Summary
- 6. <u>Index</u>

Focus Areas

Community Engagement

- Fair on 44th
- Online Survey
- Meet Me at the Park
- Sandlot Cinemas
- Lynnwood Rec Center
- RISNW Focus Groups
- · All-Abilities Focus Group
- ESD Accessibility Awareness Event
- Ethiopian Church Event
- Project Girl
- S. Lynnwood Park Listening Session
- Inclusion
- Equitable Access
- Health
- Environmental Resilience
- Project Prioritization

Community Engagement Themes

Comfort

- · Seats, picnic tables & shelter
- · Access to nature
- Perception of safety
- Clean Restrooms

Fitness + Play

- Universally accessible playgrounds
- Spray Parks
- Multi-sport courts/ Grass / synth. turf sports fields
- Multi-generational equipment

Community

- Off-leash dog areas
- Programming (cultural/community events)

Infrastructure

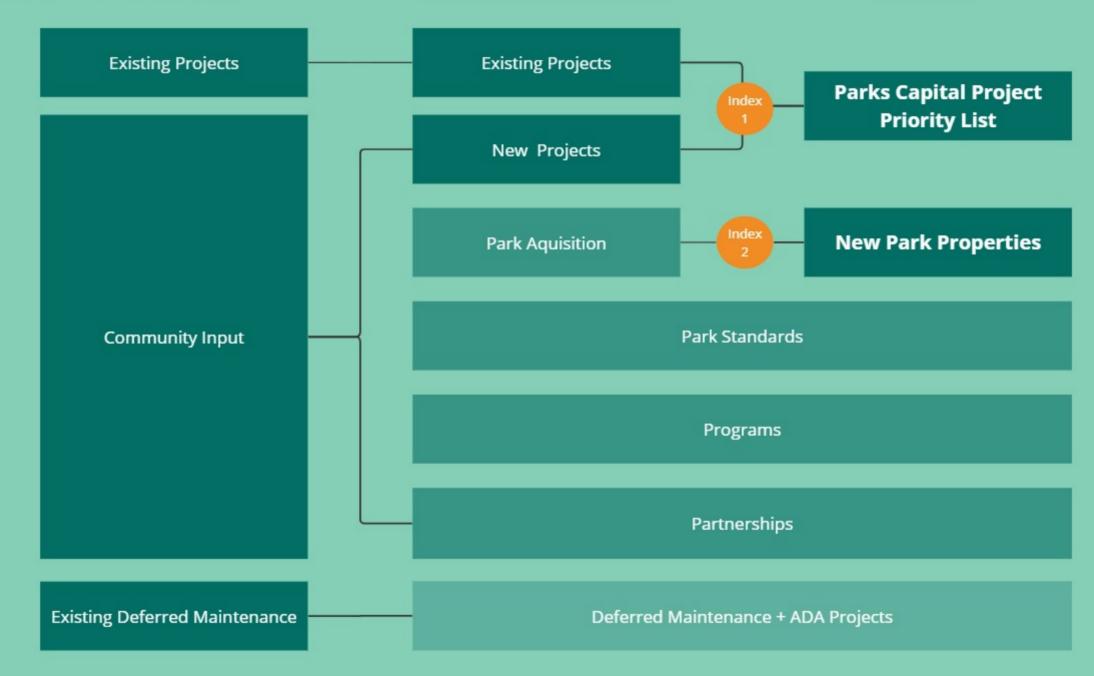

- Lighting
- Parking
- · Restroom Enhancements

What equity and resilience factors, if any, should be weighted? (select up to 3)

Questions/Comments

These are the areas that feel like community stimulants to me, because these are ways that give back to the most underserved areas and will do the most good for all for all of Lynnwood, because you're not focusing on as much on the areas of that are already decently served

"I would say for the demographics, these are the voices that are the least heard. Therefore, they need to be weighted higher. Making sure the few voices that you have of that are important."

I was weighting anything that has to do with urban heat or climate change.

I put population served because there are a lot of dense areas of the city, especially along highway 99 and the future city-center that don't have great access to parks. I think population has to factor fairly high.

Project Screening

Screening Questions

	Focus Area	Scoring
Does the project support pedestrian connectivity?	Equitable Park Access	0/1
Is the project operationally critical for the continued function of high-use park amenities?	Financial, O+M	0-2
Does the project align with a minimum of one Community Outreach Priority area?	Community	0-2
Does the project address perception of safety concerns?	Inclusion	0/1
Does the project add an amenity in a known relevant amenity gap area?	Equitable Park Access	0/1
Does the project support Parkslove goals of addressing Mental and Social Health?	Health	0-2
Does the project remove ADA barriers?	Inclusion PARKS	0-2 L

Does the project support pedestrian connectivity?

Trail projects, walking infrastructure, and loops would receive a score 1.

Is the project operationally critical for the continued function of high-use park amenities?

This score (0-2) would allow us to prioritize critical projects that may not meet other goals around equity and resilience, but are located in parks that are broadly used by many community members in Lynnwood.

Does the project align with a minimum of one Community Outreach Priority area?

This score (0-2) would allow us to prioritize projects that are desired by the community as determined by our 2023 outreach.

Does the project address perception of safety concerns?

Projects that include lighting, vegetation/site line enhancement and increase active use of space would be prioritized and receive a score of 1.

Question 5

Does the project add an amenity in a known relevant amenity gap area?

This score would allow us to prioritize projects that provide new amenities or significantly expanded amenities in related amenity gap areas. (0/1)

Question 6

Does the project support Parkslove goals of addressing Mental and Social Health?

Projects that strongly promote both mental <u>and</u> social health would receive 2 points.

Question 7

Does the project remove ADA barriers?

This score (0-2) could allow us to prioritize projects that remove high priority/significant ADA accessibility barriers.

Poll Question

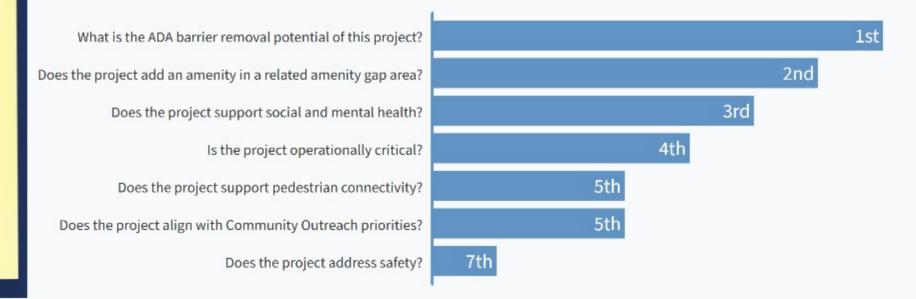

PollEv.com/lynnmcbride763

How is operationally critical a priority question? If the park can't be open, why does any of this matter? It feels like a trick question. This question is really difficult to answer because by doing one you are addressing another. Not sure if you're getting the best data out of this question.

I'm surprised at how low pedestrian connectivity is scoring.

When I first joined the CD group, I was very concerned with my perception of safety at Scriber lake park. As I've spent more time there, the concern has fallen away. I've started to equate safety concerns with site line concerns. Which for me means more straight trails, which is less interesting to me, but I understand they have ADA values. I'm conflicted about those two needs (mine or an ADA person's) It's interesting that my thoughts have changed over time about safety, even though safety issues have started to climb in Lynnwood.

Rank the project screening questions in order of priority.

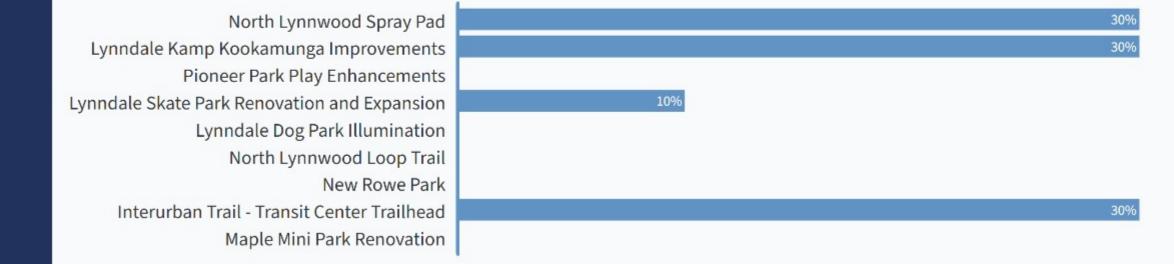

Test Projects

Park		Proposed Projects							
	+ 1	Example Scoring System

Weighting Scenario 1 - ADA Barrier Removal

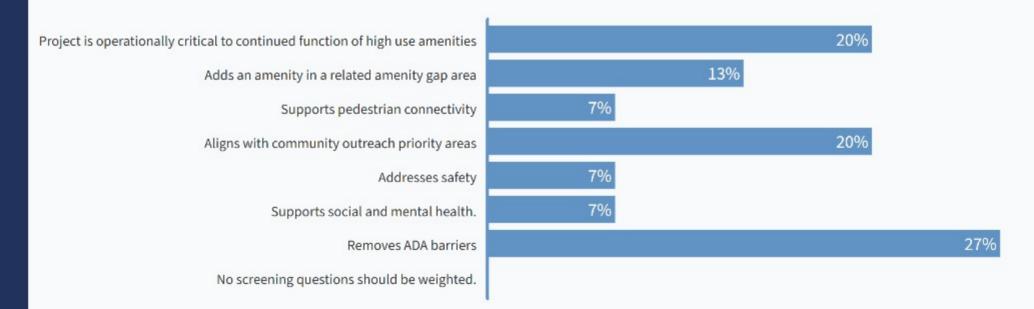

Weighting Scenario 2 - Operationally Critical Projects

Weighting Scenario 3 - Community Priority

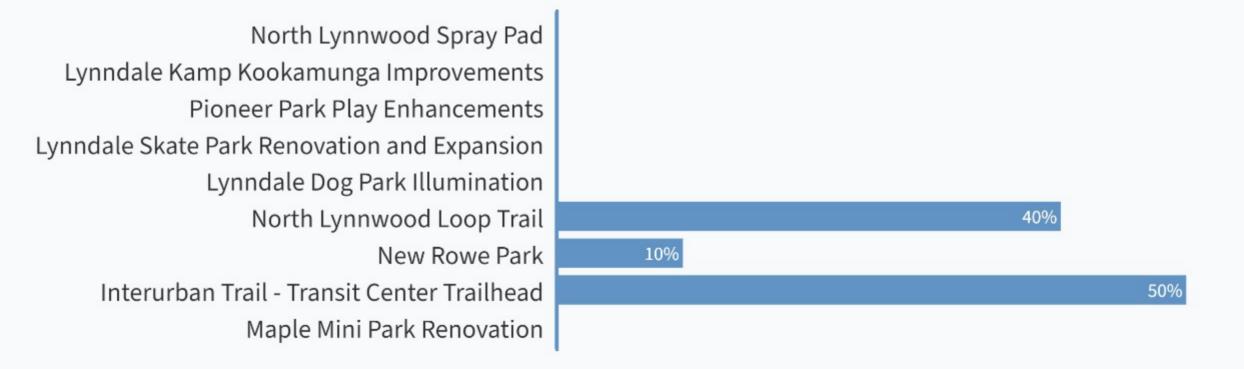

Poll Question

PollEv.com/lynnmcbride763

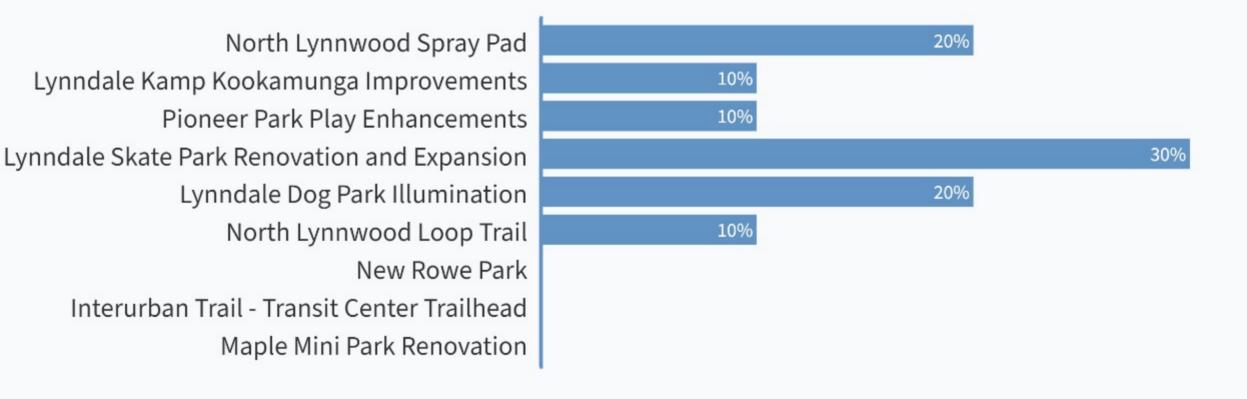

Which project screening questions, if any, should be weighted? (select up to 3)

Parks Quiz! Which projects best support pedestrian connectivity? (select up to 2)

Parks Quiz! Which projects best support social and mental health? (select up to 2)

Questions/Comments

Didn't choose safety because addressing other categories also improves safety. getting more trail project approved lighting and covered areas feed into the other categories like mental health and park use

being more clear on what the word safety means

programs and partnerships can address safety
