EXECUTIVE SUMMARY

This report presents the results of the HWA GeoSciences Inc. Phase I Environmental Site Assessment conducted for the City of Lynnwood Poplar Way Overcrossing Project (subject property). The project consists of construction of a new bridge over Interstate 5 to connect Poplar Way to the south with Alderwood Mall Boulevard to the north in Lynnwood, Washington.

The subject property is located within a commercial and industrial area of Lynnwood, Washington, and occupies Washington State Department of Transportation right-of-way connecting 196th Street SW from Poplar Way to the south with Alderwood Mall Boulevard to the north.

The subject property's current use is a combination of roadways and adjoining rights-of-way. Limited additional right-of-way will be subdivided from adjoining parcels. These areas are typically paved parking for adjoining commercial properties.

Historical research indicates the subject property has been street and right-of-way since the early 1940's. The first developed use of the subject property was a secondary street along the alignment of the modern 196th Street Southwest in the 1940's. Interstate 5 was constructed through the proposed project alignment in the 1960s. Development in the surrounding area was initially residential and agricultural, with urban and commercial development beginning in the 1960's.

This assessment has revealed no evidence of *recognized environmental conditions* in connection with the subject property, except:

- Petroleum odors were noted in shallow fill soils along 196th Street SW during a pavement condition assessment. The source or extent of these petroleum-affected soils was not determined. The soils are located in the vicinity of a listed underground storage tank site.
- Parcel 00372600100407, located northeast of the intersection of 33rd Avenue West and Alderwood Mall Boulevard, was reported to have a deed restriction associated with it. Files reviewed indicated impacts a quarter mile away from the project area, and it is unclear if these impacts are the reason for the deed restriction. Communication with the property owner or representative will be necessary to assess if any contamination impacts are within the proposed project alignment.

Although RECs were found, HWA does not recommend a Phase II ESA at the subject property, for the following reasons:

- Planned site improvements are mostly above grade, requiring little excavation or grading, with the exception of retaining walls and bridge piers.

**PHASE I ENVIRONMENTAL SITE ASSESSMENT
CITY OF LYNNWOOD
POPLAR WAY OVERCROSSING PROJECT
LYNNWOOD, WASHINGTON**

1.0 INTRODUCTION

This report presents the results of the HWA GeoSciences Inc. (HWA) Phase I Environmental Site Assessment (ESA) conducted for the City of Lynnwood Poplar Way Overcrossing Project (subject property). The project consists of construction of a new bridge over Interstate 5 to connect Poplar Way to the south with Alderwood Mall Boulevard to the north in Lynnwood, Washington. Figure 1 shows the site location and vicinity.

1.1 Purpose

The primary objective of the Phase I ESA was to evaluate the subject property for *recognized environmental conditions* (RECs). “The term *recognized environmental conditions* means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *recognized environmental conditions*.” (ASTM, 2005).

Objectives of a Phase I ESA typically include:

- Satisfying the requirements necessary to establish the innocent landowner defense under CERCLA.
- Providing Superfund liability limitations for bona fide prospective purchasers and contiguous property owners. Such parties must undertake "all appropriate inquiry" into prior ownership and use of a property at the time of property acquisition.
- Satisfying the requirements of brownfields grants awarded under CERCLA 42 U.S.C. Section 9604(k)(2)(B)(ii).

The primary purpose of conducting a phase I ESA is to 1) provide background information for recently discovered soil contamination, and 2) help plan construction of facility improvements at the site.

1.2 Scope of Work

To accomplish the above-stated objectives for the Phase I ESA, the following scope of work was performed, in general accordance with ASTM Practice E-1527-05:

- Conduct Environmental Data Review
- Perform Site Investigation
- Interview Owners/Operators, and/or past owners/operators or neighboring property occupants (if necessary to achieve reporting objectives)
- Prepare this Phase I Environmental Site Assessment Report

1.3 Limitations of Assessment

The conclusions expressed by HWA are based solely on material referenced in this report. Observations were made under the conditions stated. Within the limitations of scope, schedule and budget, HWA attempted to execute these services in accordance with generally accepted professional principles and practices in the area at the time the report was prepared. No warranty, express or implied, is made. HWA's findings and conclusions must not be considered as scientific or engineering certainties, but rather as our professional opinion concerning the significance of the limited data gathered and interpreted during the course of the assessment.

This ESA has been prepared on behalf of the Perteet and the City of Lynnwood and is solely for use in an environmental evaluation. We are not responsible for the impacts of any changes in environmental standards, practices, or regulations subsequent to performance of services. We do not warrant the accuracy of information supplied by others, nor the use of segregated portions of this report.

Unless specifically stated in the report, HWA has not performed specific testing or analysis to determine the presence or absence of any chemical, physical, radiological, or biological hazard or condition, including, but not limited to: wetlands, endangered species issues, asbestos containing materials, lead-based paint, lead in drinking water, radon, or PCBs.

This report and its findings are valid for a period of one year from the date of issue, with the exception of the following items, which require updates after a period of 180 days: interviews, site reconnaissance, and historical records review.

HWA employees Arnie Sugar and Vance Atkins, both Environmental Professionals as defined in ASTM Practice E-1527-05, conducted this Phase I ESA. Appendix A contains Mr. Sugar's and Mr. Atkins' resumes.

2.0 SITE DESCRIPTION

The following report subsections provide a description of the site, the geographic setting, and geologic/hydrologic conditions, based on reviewed background documentation and the site reconnaissance.

2.1 Location

The subject property is located within a commercial and industrial area of Lynnwood, Washington, and occupies Washington State Department of Transportation (WSDOT) right-of-way (ROW) connecting 196th Street SW from Poplar Way to the south with Alderwood Mall Boulevard to the north. The primary portion of subject property is not a tax parcel, and has no single encompassing property boundary, other than the boundaries of adjoining parcels and rights-of-way. Several adjoining parcels are under consideration for partial acquisition to expand roadway and right-of-way. These parcels include:

- 00372600200902
- 00372600201801
- 00372600100407
- 00372600200901
- 00372600100603
- 00372600100400
- 00372600200701
- 00372600200801
- 27041500400100

The City is in the process of initiating property transactions for these parcels, and did not have access agreements for the parcels at the time of this report preparation.

Figures 1 and 2 show the location and vicinity of the subject property. Figure 3 shows the proposed structure and alignment with adjoining partial acquisition parcels highlighted.

2.2 Physical Setting

The subject property lies in a gently sloping urban/commercial traffic corridor east of downtown Lynnwood. The site includes portions of two north-south arterials (Poplar Way and 33rd Avenue W) and the proposed area of overcrossing Interstate 5 (Figure 2). Elevations range from approximately 400 to 425 feet above mean sea level (MSL) across the site. Land use in the vicinity of the subject property is commercial.

2.3 Geologic/Hydrogeologic Setting

Geologic information for the subject property was obtained from a geologic map of the vicinity (Booth, et al, 2004). According to this map, the surface geology at the subject property consists primarily of medium dense to dense recessional outwash and fill, overlying very dense glacial till. Deep explorations along the project alignment suggest that the glacial till is underlain by very dense advance outwash sand. Available soil information suggests that the recessional outwash and fill deposits, overlying the glacial till soils, range in thickness from 1 to 10 feet depending on the location. The very dense glacial till deposit ranges in thickness from 15 to 50 feet.

Two groundwater tables are present along the project alignment. A seasonally varying perched groundwater table is expected within the near-surface recessional outwash and fill soils just above the glacial till. Shallow ground water was encountered at approximately 23 feet below ground surface (elevation 396 ft above msl) at piezometer BH11, installed as part of the geotechnical investigation. Additionally, groundwater under artesian pressure is expected within the advance outwash underlying the glacial till cap.

2.4 Current Use of the Site

The site's current use is a combination of roadways and adjoining rights-of-way. Limited additional right-of-way will be subdivided from adjoining parcels (Section 2.1). These areas are typically paved parking for adjoining commercial properties.

2.5 Site Description

The subject property consists of a portion of a City of Lynnwood and WSDOT rights-of-way, shown on Figure 2. The subject property is generally flat and paved with asphalt.

The nearest surface water body is Swamp Creek, located approximately one mile east of the subject property.

2.6 Current Use of Adjoining Properties

Adjoining property use includes:

- North – 33rd Avenue West, Multi-tenant commercial development
- South – Alderwood Parkway, Jaguar and Land Rover of Seattle
- East – Lowes Home Improvement, Bed Bath and Beyond, multi-tenant commercial
- West – Undeveloped area with cellular tower, multi-tenant commercial

Adjoining property also includes Interstate 5, which the subject property/project

alignment overcrosses.

2.7 User-Provided Information

Robert Victor of the City of Lynnwood completed the User Questionnaire, which is included in Appendix B.

3.0 SITE HISTORY AND AGENCY REVIEW

The objective of consulting historical sources is to investigate the history of the previous uses of the subject property and surrounding area in order to help identify the likelihood of past uses having led to RECs in connection with the subject property. HWA investigated land use history by reviewing historical aerial photographs, topographic maps, reverse city directories, and Sanborn fire insurance maps.

Historical research indicates the subject property has been street and right-of-way since the early 1940's. The first developed use of the subject property was a secondary street along the alignment of the modern 196th Street Southwest in the 1940's. Interstate 5 was constructed through the proposed project alignment in the 1960s. Development in the surrounding area was initially residential and agricultural, with urban and commercial development beginning in the 1960's.

3.1 Title Documents

Title documents for the subject property were not available and were not reviewed. No other historical title documents were provided.

3.2 Historical Aerial Photographs

HWA reviewed historical aerial photographs of the subject property and vicinity available from Google Earth and Environmental Data Resources (EDR, 2013a). Copies of the EDR aerial photographs are included as Appendix C.

1941 (EDR) - The subject property is undeveloped or developed as agricultural usage. Secondary streets or roadways are present along the present alignments of 196th Street Southwest, 33rd Avenue West and Interstate 5.

1952 (EDR) – The subject property is undeveloped and vegetated. The alignment of the current Poplar way is to the east of the present alignment. The surrounding properties appear to be residential and agricultural in nature, with apparent orchards on numerous parcels. Streets have been improved and extended.

April 2, 2014
HWA Project No. 2012-121-21

1968 (EDR) – The subject property vicinity has been developed by the construction of Interstate 5. 196th Street Southwest is improved and has an overpass over Interstate 5. The general site vicinity includes additional residential and commercial development.

1971 (EDR) – The subject property appears much as it does in the 1968 photograph. Additional commercial-scale structures are visible west of the subject property, and roadway improvement is visible in the general vicinity.

1980 (EDR) – Photograph resolutions makes it difficult to discern details at the subject property and vicinity. The Alderwood Mall has been constructed approximately one-half mile north of the subject property alignment. Some additional commercial development has occurred to the west.

1990 (EDR) – Significant changes are not noted at the subject property. Additional commercial development is visible west of Interstate 5.

2001 (Google Earth) – Poplar Way has been reconstructed along its current alignment. A commercial property and asphalt-paved parking is east of the alignment. Additional commercial development is visible east and northwest of Interstate 5.

2005 (EDR) – Significant changes are not noted at the subject property or subject property vicinity.

2009 (Google Earth) – Significant changes are not noted at the subject property or subject property vicinity.

2011 (Google Earth) – Significant changes are not noted at the subject property or subject property vicinity.

2012 (Google Earth) – Significant changes are not noted at the subject property or subject property vicinity.

Other than the features described, HWA did not observe any evidence within the subject property of surface features typically associated with environmental contamination that are visible in aerial photographs.

3.3 Historical Topographic Maps

HWA reviewed historical topographic maps from 1895, 1897, 1944, 1953, 1968, 1973 and 1981 provided by EDR (EDR, 2012b). These maps are included in Appendix D.

1895 – The map shows the subject property and vicinity to be undeveloped. An unimproved roadway is visible west of the subject property running in a northeast-southwest alignment. Wetland areas are depicted along Swamp Creek and Scriber Lake, approximately one mile east and west of the subject property, respectively.

1897 – There are no significant differences in the project vicinity from the 1895 topographic map.

1944 – Roadways, including Southwest 196th Street, 33rd Avenue, and Poplar Way are located in the subject property vicinity. The alignment of the current Poplar Way is to the east of the present alignment. The surrounding properties appear to be residential and agricultural in nature.

1953 – No significant changes are visible at the subject property. Vicinity streets have been expanded and improved. Increased residential development is depicted in the site vicinity.

1968 – Interstate 5 has been constructed and crosses through the subject property. Vicinity streets have been expanded and improved. Increased residential development is depicted in the site vicinity, and commercial-scale structures are depicted west of Interstate 5.

1973 – There are no significant differences in the project vicinity from the 1968 topographic map.

1983 – The subject property appears unchanged from the 1973 topographic map. Additional commercial-scale structures are depicted west of Interstate 5.

Features were noted on the maps indicating changes in topography and filling of roadway areas at the subject property and vicinity. Other changes included a gradual increase in residential and commercial development around the subject property vicinity.

3.4 Sanborn Insurance Maps

Sanborn Fire Insurance maps were not available for the subject property and vicinity.

3.6 Agency Database Review

The purpose of the records review is to obtain and review records that will help identify RECs in connection with the subject property. HWA contracted EDR to conduct a review of regulatory databases. Appendix F contains the complete EDR report, including a table summarizing the results of the database search, and maps showing the approximate locations of identified sites. Table 1 provides a summary of the lists reviewed, search radii, and corresponding acronyms. Table 2 provides a summary of sites that may be considered RECs with respect to the subject property.

The EDR report did not identify the subject property as a listed site.

April 2, 2014
HWA Project No. 2012-121-21

The EDR report identified four sites adjacent to the subject property in the searched government and/or referenced databases that could potentially be considered RECs. These include:

- 19904 Poplar Way, Facility ID 8864885
- Eastside Land Rover, Facility ID 23571
- Active Electric, Facility ID 44131295
- JC Penney, Facility ID 92955351

HWA also reviewed the EDR 'Orphans' list of unmapped sites. Twenty-nine sites were listed. Based on HWA's review of the sites and field observations, all but one of the listed sites are outside of the applicable search radii. The listed site included within the search radii is considered to have a high likelihood of having an adverse effect on the subject property.

- Lynnwood City I 5 & 196th St, Facility ID 19913453

An additional site (Pearl Cohrs, EDR ID#1), marked adjacent to the site, is approximately ½ mile south, based on the listed address.

Appendix F contains a complete list of databases searched, location maps, and information on the individual facilities.

3.7 Known or Suspected Environmental Conditions

Sites with a likelihood of having an adverse affect on the subject property are listed in Table 2. HWA requested available files at the Washington State Department of Ecology (Ecology) Northwest Regional Office for selected sites near the subject property. The findings of the review are discussed below.

**TABLE2
SITES WITH RECOGNIZED ENVIRONMENTAL CONDITIONS
BASED ON REGULATORY RECORD SEARCHES**

REC ¹ Y/N	Distance ²	Justification	Map ID Code	Site Name and Address	Database Listing	Condition	Contaminant	Media

1. RECs are "recognized environmental conditions" for the subject property listed in the Conclusions section of this report and are the outcome of the entire Phase I ESA discernment process.
2. The distance field contains approximate distance, direction and whether the site is higher or lower elevation than the subject property.

3.8 File Review

A3: Seattle Auto Center, 11904 Poplar Way

The site is located at the southwest corner of Poplar Way and 198th Street SW, at the south end of the project alignment. The file included a scope of work and Ecology correspondence, but no cleanup report. Based on forms completed as part of the Voluntary Cleanup Program review application, a 300 gallon above-ground storage tank and 500 gallon UST were removed from the former residential site. The tanks both contained heating oil, and releases of petroleum to the site soil were recorded. Approximately 26.5 tons of soil were removed from the site between April and May 2001.

Ecology granted a No Further Action (NFA) determination in January 2005 (Ecology, 2005).

Based on the reported completed cleanup and NFA, this site has a low likelihood to adversely affect the project corridor.

A4: Eastside Landrover Lynnwood, 19910 Poplar Way

No files were available for this site.

B5: Active Electric Corporation, 3108 196th St SW

The site reportedly had two tanks containing leaded gasoline, of unknown construction or size. One was listed as 500-999 gallons, the second as 1000-4999 gallons, on the Change in Service form. According to the property owner, the USTs were reported to have been installed in 1968, and their last use was in 1976. The file did not include a site assessment report, nor were releases reported or documented. The tanks were listed as abandoned and out of use in 1991 (Active Electric, 1991).

Based on the historic fuel storage at the site and lack of conclusive assessment information, this site is considered to have a moderate likelihood to adversely affect the project corridor.

45: JC Penney, 18601 33rd Ave W

The site is located approximately ¼ mile northeast of the project corridor. Two USTs were removed from the site in 1993, a 300 gallon diesel UST and a 500 gallon waste oil UST. The USTs were located at the northwest corner of the building.

A release was confirmed from the waste oil UST. Additional soils were removed and post-excavation samples from both tank excavations were reported to be below cleanup levels (ATC Associates, 1998).

April 2, 2014
HWA Project No. 2012-121-21

Ecology granted an NFA determination in June 2012 (Ecology, 2012a and 2012b).

Based on the distance of the site from the project corridor and the reported completed cleanup and NFA, this site has a low likelihood to adversely affect the project corridor.

*Orphans Site List: Lynnwood City I 5 & 196th St/Alderwood Mall Blvd.
Connector/Wicker's House*

During construction of the 196th Street SW/Alderwood Mall Boulevard connector and off-ramp, two pairs of USTs were discovered, removed, and assessed. One pair was south of 196th Street and one pair was north of the street. These tanks were located on the west side of Interstate 5.

A 500 gallon heating oil UST and 1000 gallon heating oil UST were located on the south side of the street during construction for Pier 1 of the connector overpass (Gneiss Contracting, 1998a). The USTs were pumped and cleaned. Both were filled with water and petroleum and were reported to be in fair to poor condition. One sidewall sample for the northern UST contained petroleum hydrocarbons at greater than the applicable MTCA cleanup level at the time of the remedial action (200 ppm). However, additional excavation was not completed due to the proximity of an adjacent water main and street. Post-excavation samples collected at the southern UST did not contain petroleum hydrocarbons at detection limits, and no additional work was recommended.

Ecology granted an NFA determination in June 2012 (Ecology, 2012c).

Two additional USTs were located during construction along the north side of 196th Street SW. Both were 750 gallon heating oil USTs. The tanks were located in an east-west alignment adjacent to the Pier 3 excavation. The USTs were pumped and cleaned. Both were in poor condition. T1, the westernmost UST, was filled with water and petroleum. The eastern UST, T2, was empty (Gneiss Contracting, 1998b).

Petroleum hydrocarbons exceeding the applicable MTCA cleanup level at the time were detected in the UST excavation base and southwest sidewall samples. Samples collected in adjacent east Pier3 excavation did not contain detectable petroleum hydrocarbons. The tank excavation was subsequently overexcavated to the south and southwest to 7 feet depth. Post excavation samples did not contain detectable petroleum hydrocarbons. Approximately 343 tons of petroleum-affected soils were transported offsite for disposal.

Ecology granted an NFA determination in June 2012 (Ecology, 2012d).

Based on the reported completed cleanups and NFAs, these two sites have a low likelihood to adversely affect the project corridor.

WSDOT provided a corridor study related to construction of an improved ramp for the Interstate 5/ SR-524 (196th Street SW) interchange and an auxiliary southbound traffic

April 2, 2014
HWA Project No. 2012-121-21

lane along Interstate 5 between SR-525 and SR-524 (AMEC, 2009). The corridor study consisted of a summary of the construction impacts and activities, including right-of-way acquisition, subsurface activities and an agency database review of listed sites within a ¼ mile radius of the project corridor (delineated between the SR-525 interchange to the north and SR-524 interchange to the south).

AMEC identified 22 sites within the project corridor with the potential to adversely affect the project area. Upon review, the majority of the sites were considered to have a low potential to impact the project corridor. One site, the Edmonds School District 15 Transportation Garage, was considered to have a high likelihood to impact the project corridor due to its upgradient position and reported releases of petroleum and solvents to soil and ground water. This site was identified on the current EDR agency database report (ID #s I28-I30). It is located approximately ¼ mile north and in a presumed downgradient position of the current project alignment and is not considered to have a high potential to impact the current project.

No additional information indicating potential adverse impacts to the project corridor were identified in this report.

4.0 SITE INVESTIGATION

4.1 Interviews

HWA interviewed selected personnel knowledgeable about the subject property. The following is a summary of each of the interviews.

Robert Victor, City of Lynnwood

HWA spoke with Mr. Victor as a representative of the City knowledgeable of the project alignment and vicinity. Mr. Victor is the project manager for the overcrossing project and several projects in the vicinity.

Mr. Victor did not have information regarding any known releases within the project alignment. He reported that the parcel adjacent northeast of the intersection of 33rd Avenue West and Alderwood Mall Boulevard had an apparent deed restriction for surface or soil disturbances. The City is currently in negotiation with the property owner for a partial acquisition of the property for expansion of right of way. A listing possibly associated with this parcel (00372600100407) was mapped on the Ecology Facility/Site database and appears on the EDR database report (JC Penney, EDR ID# 45). The site is listed as a former UST and cleanup site. Based on this information, HWA requested available cleanup reports from Ecology for further review. Based on file review (above), the site of the release is on a separate parcel approximately ¼ mile northeast and downgradient of the project corridor, and not in a position adjacent to the project corridor. No other suspect sites were listed on EDR or Ecology databases.

April 2, 2014
HWA Project No. 2012-121-21

At the time of writing, the City had not yet secured access to adjacent properties under consideration for partial transfers, and HWA was not able to confirm site conditions with property owners or representatives.

Jesse Perrault, City of Lynnwood

HWA spoke with Mr. Perrault as a representative of the City knowledgeable of the project alignment and vicinity. Mr. Perrault has been a project manager for several projects in the vicinity. According to Mr. Perrault, he did not have information regarding any known releases within the project alignment.

With respect to nearby locations, Mr. Perrault reported that petroleum-affected soils were encountered during subsurface work for a previous interchange and signalization project at the intersection of 196th Street SW and 36th Ave West. This location is west of the project alignment, and may be associated with the “Lynnwood City I 5 & 196th St” LUST site listed on the EDR report.

Petroleum-affected spoils were also encountered during subsurface work in the vicinity of the intersection of 196th Street SW and Alderwood Mall Parkway. This location is approximately 1,500 feet east and unlikely to affect the project alignment.

Additionally, significant cutting and grading of the original topography has occurred east of the project alignment as part of area development. As such, historical shallow or surficial contamination will have likely been removed during these activities.

Patrick Svoboda, Washington Department of Transportation

HWA spoke with Mr. Svoboda as a representative of WSDOT knowledgeable of the project alignment and vicinity. Mr. Svoboda is the hazardous materials manager for the WSDOT region including the project vicinity.

Mr. Svoboda provided a Hazardous Materials Report prepared by AMEC for WSDOT (AMEC, 2009). This report is discussed above.

HWA requested additional information from Mr. Svoboda to determine if any contaminated soils or ground water were encountered during the construction of the auxiliary lane and interchange. Mr. Svoboda reported that petroleum contamination was encountered near the SR-524 intersection during construction, and that these soils were removed.

4.2 Site Reconnaissance

Mr. Vance Atkins LG, LHG (Hydrogeologist) from HWA GeoSciences Inc. conducted a site reconnaissance on June 3, 2013. The site reconnaissance proceeded with a walking tour of the subject property, followed by a drive-by reconnaissance of surrounding areas

for evidence of surficial contamination or use and/or storage of hazardous or regulated materials.

Sections 2.2, 2.4, 2.5 and 2.6 (above) describe the site setting, characteristics, and use of adjoining properties. Appendix G contains selected site photographs.

The site consists of existing streets and right-of-ways. Streets are asphalt paved with adjoining concrete sidewalks or landscaped medians. The surface of the asphalt was in generally good condition. The project alignment also includes several areas of planned right-of-way acquisition of private property. HWA did not have access to these properties, but observation from the right-of-way showed these areas to be generally paved parking and adjoining landscaping. Evidence of hazardous materials use, storage, or releases was not observed at the time of HWA's reconnaissance.

4.3 Utilities

Public utilities underlie the site roadways and include water, stormwater, sanitary sewer and natural gas. Significant odors or sheens were not noted in stormwater catch basins observed in the vicinity. Overhead utilities include electricity and communications. A cellular tower is located adjacent southwest of the 196th Street SW/Poplar Way intersection.

4.4 Geotechnical Investigation Observations

During HWA's geotechnical investigation (HWA, 2013), soil samples were examined for evidence of potential petroleum contaminant indicators, such as odors or staining. No evidence of petroleum impacts was observed in any of the geotechnical borings, therefore no environmental samples were collected. However, a petroleum odor was observed at a depth of 1.5 feet in pavement core C-6 (Figure 3). This core was located along the south (eastbound) lane of 196th Street SW in the vicinity of the Active Electric Corporation property, a listed underground storage tank (UST) site. Due to the shallow nature of the petroleum, it was not determined if the source was from a site release, or from roadway impacts such as a former oiled road bed or vehicle leaks/spills. No environmental samples were obtained at the time the pavement core was advanced.

5.0 DATA GAPS AND EXCEPTIONS

Data gaps (as defined in 40 CFR Part 312.10) in the information developed as part of the all appropriate inquiry affect the Environmental Professional's ability to identify conditions indicative of releases or threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or to the subject property.

HWA did not have access to parcels under consideration for partial acquisition as part of right-of-way expansion. As such, HWA can make no determination regarding environmental liability other than that available from historical sources and a visual survey.

HWA did not identify any other significant data gaps that could affect the outcome of the findings presented herein.

6.0 PHASE I FINDINGS AND CONCLUSIONS

HWA has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E 1527-05 of the proposed Poplar Way Overcrossing project in Lynnwood, Washington. Any exceptions to, or deletions from, this practice are described in Section 5.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the subject property, except:

- Petroleum odors were noted in shallow fill soils along 196th Street SW during a pavement condition assessment. The source or extent of these petroleum-affected soils was not determined. The soils are located in the vicinity of a listed UST site.
- Parcel 00372600100407, located northeast of the intersection of 33rd Avenue West and Alderwood Mall Boulevard, was reported to have a deed restriction associated with it. Files reviewed indicated impacts a quarter mile away from the project area, and it is unclear if these impacts are the reason for the deed restriction. Communication with the property owner or representative will be necessary to assess if any contamination impacts are within the proposed project alignment.

Although RECs were found, HWA does not recommend a Phase II ESA at the subject property, for the following reasons:

- Planned site improvements are mostly above grade, requiring little excavation or grading, with the exception of retaining walls and bridge piers.

It is our understanding that construction of the overcrossing will primarily involve raising the grade at the north and south approaches, although subsurface construction will be required for retaining walls and bridge piers.

Due to the nature of the project alignment as a historic roadway there is a potential to encounter shallow petroleum-affected soils from accidental releases or former roadway impacts (e.g., oiled road beds). As such, construction specifications should include provisions for safe handling, characterization, transportation, and disposal of petroleum-contaminated soils, if encountered during subsurface activities.

RESUMES

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

**ARNIE SUGAR, LG, LHG
PRINCIPAL HYDROGEOLOGIST
PRESIDENT, HWA GEOSCIENCES**

EDUCATION

MS, Geology, University of Pennsylvania, 1984

BS, Geology, Honors (course equivalent), University of Pennsylvania, 1983

BS, Biology, Lafayette College, Pennsylvania, 1981

PROFESSIONAL REGISTRATIONS

Licensed Geologist and Hydrogeologist: 2000/Washington No. 170

Licensed Geologist: 1990/Idaho No. 674, 1990/California No. 4986

AFFILIATIONS

National Ground water Association, Washington Hydrologic Society

EXPERIENCE

Mr. Sugar has 26 years of experience in geology, hydrogeology, environmental consulting and remediation, including extensive experience in designing and conducting environmental site assessments, from Phase One Property Transaction Assessments to site-specific ground water and soil investigations. He has worked with a variety of contaminants, media and investigative techniques, and designs site assessment to match these variables.

SELECTED PROJECTS

Snohomish 4th and Maple, Snohomish, Washington. Arnie conducted a Phase II Environmental Site Assessment and storm water infiltration evaluation of 1.3 acre site slated for development of a senior center and trail access.

Seattle City Light On-Call Environmental Services, Seattle, Washington. Managed on-call environmental consulting services contract including site characterization, Phase I and II site assessment, remediation design, waste management, risk assessment and site closure on over 30 task orders

Lake Stevens Wastewater Treatment Plant, Lake Stevens, Washington. Performed a Phase I Environmental Site Assessment of future wastewater treatment plant site, and assisted with handling soil contamination encountered during construction of other wastewater improvements.

Duwamish Substation and Georgetown Pump Station, Phase I & II ESAs, Seattle, Washington. Conducted Phase I and Phase II Environmental Site Assessments at sites under consideration for potential wetlands mitigation and shoreline restoration.

Bothell Crossroads, Bothell, Washington. Mr. Sugar managed this project that has multiple Phase I and II environmental site assessments for roadway realignment project.

Additionally, he provided support services for multiple property acquisition negotiations, provided remediation cost estimates, regulatory compliance, negotiation, and grant funding support. Mr. Sugar also prepared SEPA/NEPA discipline reports for soils, ground water, and hazardous materials.

Ship Canal Trail, Seattle, Washington. Conducted Phase I and II environmental site assessments of an approximately 0.75-mile alignment along the Seattle Ship Canal. Completed Preliminary Site Investigation (Phase II site investigation), which included soil and ground water sampling and analysis. Prepared a Hazardous Materials Discipline Report for use in a SEPA Environmental Assessment.

East Marine View Drive, Everett, Washington. Conducted soil sampling for planned roadway and utility improvements project, in area impacted by heavy metals from the former Everett ASARCO Smelter. Obtained regulatory approval and developed a streamlined soil management plan for construction, allowing the contractor to manage soils based on location, without further testing during construction. Soil management options included reuse on site, on-site fill under pavement, and off site disposal.

Sound Transit Light Link Rail Phase I-II Site Assessments, Seattle, Washington. Managed over 20 Phase I and 6 Phase II environmental site assessments, some of which occurred concurrently. Each included a strict budget and schedule, which were adhered to. Phase I site assessments included data review, site reconnaissance, and preparation of standardized reports for Sound Transit's property acquisition program. Phase II investigations included data review, preparation of work plans, drilling and sampling soil borings and probes, and preparing site assessment reports. The Phase II investigations were designed with future site use in mind (e.g., explorations focused on areas of future excavation or earthwork), and included recommendations for handling contaminated media during construction.

Seattle Parks and Recreation Department, Open Space Program, Level I Environmental Assessments, Seattle, Washington. Perform several Level I Environmental Assessments for the Seattle Department of Parks and Recreation Open Space Program, in Seattle, Washington. Evaluated environmental quality of properties for purchase by performing federal and state agency document reviews, reviews of site histories, and surficial site examinations.

Washington State Department of Transportation Initial Site Assessments, Various Locations, Washington. Performed Level One environmental property assessments on WSDOT properties for sale, lease or potential right of way acquisitions for roadway improvements.

Lynnwood Park and Ride, Lynnwood, Washington. Performed Phase 1 Environmental Site Assessments at several sites under consideration for a Transit Center. Planned Phase 2 site investigation, including soil probe sampling to reduce cost and impacts to current site owners.

**VANCE ATKINS, LG, LHG
SENIOR HYDROGEOLOGIST**

EDUCATION

Graduate Study in Ground water Hydrology, New Mexico Tech, 1991
B.S., Geology, University of Puget Sound, 1990

PROFESSIONAL REGISTRATIONS

Geologist/ Hydrogeologist #132 (2002)
Certified Professional Geologist #10359, American Institute of Professional Geologists (1999)
OSHA HAZWOPR 40-hour training (1994)
OSHA 8-hour supervisor training (1995)

EXPERIENCE

Mr. Atkins has over 20 years of experience as a hydrogeologist and has performed a variety of work elements associated with hazardous waste site and water resource projects. His experience includes environmental site assessments, site investigations, removal and closure of underground storage tanks (USTs), ground water monitoring well installation and sampling, surface and subsurface soil and water sampling, Environmental Impact Studies, dewatering system design, water resource assessments, and project management.

SELECTED PROJECTS

Bothell Crossroads, Bothell, Washington. Mr. Atkins completed Phase I ESAs of six properties under consideration for purchase by the City as part of a downtown redevelopment project and associated roadway realignment. He completed sampling and analysis plans for selected properties and conducted multiple on-site investigations to delineate contaminated areas, and identified potential construction impacts associated with contaminated soils and groundwater at the properties. Managed site remediation during subsequent construction phases.

Everett Housing Authority Multiple Environmental Phase I ESA's, Snohomish County, Washington. Performed Phase I Environmental Site Assessments for the Housing Authority on seven properties in Everett, Washington. The subject properties were multi-unit residential developments under consideration for purchase or refinancing by the Housing Authority.

White River Corridor Phase I Site Assessment, King and Pierce Counties, Washington. Performed a Phase I Environmental Site Assessment on approximately 2,500 acres along a 10-mile corridor adjacent to the White River west of Buckley, Washington. The subject property is undeveloped forest land, with the exception of construction

associated with a hydroelectric diversion flume and utility right-of-ways. The property was being transferred from utility company ownership to public land. This Phase I ESA was conducted in general accordance with ASTM standard E-1527-05.

Beaver Creek Phase I Site Assessments, Sappho, Washington. Performed a Phase I Environmental Site Assessment on 440 acres of land located north of Sappho. The subject property is undeveloped forest land, except for timber harvesting since the early 1900's. The property was being transferred from ownership by a timber company to temporary land conservancy ownership. Completed an additional Phase I ESA in April 2008 for transferal of the property from conservancy ownership to public land. This Phase I ESA was conducted in general accordance with ASTM standard E-1527-05 and included completion of additional U.S. Forest Service scope requirements.

Yakima Valley Transportation Company Phase I Site Assessment, Yakima, Washington. Managed and performed a Phase I ESA at a historic property located in Yakima for a purchase by the City for preservation and use. Based on the findings of the Phase I ESA, a Phase II ESA was recommended at the site to assess potential historic impacts.

Boise Cascade Phase I Assessments, multiple sites, national. Managed Phase I ESAs for multiple properties nationwide. Coordinated and managed staff in 25 offices for over 30 sites. Compiled and produced draft and final reports with client review.

Home Depot Phase I & II Assessments, multiple sites, western Washington and Oregon. Managed and performed Phase I ESAs for multiple properties in western Washington and Oregon. Managed and performed follow-up Phase II site investigations at sites where potential RECs were identified.

APPENDIX B
USER QUESTIONNAIRE

USER QUESTIONNAIRE

INTRODUCTION

In order to qualify for one of the Landowner Liability Protections (LLPs)¹ offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that “all appropriate inquiry” is not complete.

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

NO

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Parcel adjacent northeast of the intersection of 33rd Avenue West and Alderwood Mall Boulevard has an apparent deed restriction for surface or soil disturbances (Partial ROW acquisition)

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

NO

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Purchase price for properties associated with partial ROW acquisition have not been determined at this time. An offer will be extended once environmental documentation related to federal funding requirements has been completed. Offer price will take into account conditions on the site.

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

a. Do you know the past uses of the property?

Poplar Way and adjoining streets (Southwest 196th Street, 33rd Avenue, and Alderwood Mall Boulevard) have been roadways since the 1940’s. Adjoining properties have been commercial in nature since the 1970’s.

b. Do you know of specific chemicals that are present or once were present at the property?

NO

¹ Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund liability in EPA’s Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability (“Common Elements” Guide) issued on March 6, 2003.

September 20, 2013

HWA Proposal No.

c. Do you know of spills or other chemical releases that have taken place at the property?

NO

d. Do you know of any environmental cleanups that have taken place at the property?

NO

6. The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

NO

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

HWA GeoSciences, Inc. (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

EXECUTIVE SUMMARY

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

COUNTRYSIDE DEVELOPMENT Facility Type: Hazardous Sites List		S 1/2 - 1 (0.978 mi.)	68	243

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 01/22/2013 has revealed that there are 10 CSCSL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 01/22/2013 has revealed that there are 8 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/12/2013 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 3 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	19502 37TH AVE W	W 1/8 - 1/4 (0.213 mi.)	H20	52
Not reported	19526 37TH AVE W	W 1/8 - 1/4 (0.214 mi.)	E22	56
Not reported	3701 196TH ST SW	W 1/8 - 1/4 (0.221 mi.)	E27	70

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 04/06/1989
Facility name: MSC MICROFILM SVC CO
Classification: Not a generator, verified

Violation Status: No violations found

FINDS:

Registry ID: 110005348150

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:

Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Waste type: Lamps
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D005
Waste name: BARIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D018
Waste name: BENZENE

Waste code: WSC2
Waste name: Washington State solid or semisolid corrosive Dangerous Waste with a pH less than or equal to 2, or greater than or equal to 12.5, based upon a specific testing method.

Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Waste code: D001

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
 Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

1000101021

EPA Region: 10
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 03/01/1996
Facility name: ALDERWOOD COLLISION
Classification: Conditionally Exempt Small Quantity Generator

Date form received by agency: 01/01/1994
Facility name: ALDERWOOD COLLISION
Classification: Not a generator, verified

Date form received by agency: 12/31/1993
Facility name: ALDERWOOD COLLISION
Classification: Small Quantity Generator

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Classification: Not a generator, verified

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

Registry ID: 110005359147

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 12/15/1999
Facility name: LYNNWOOD PLATING
Classification: Large Quantity Generator

Facility Has Received Notices of Violations:

Regulation violated: SR - 320
Area of violation: Generators - General
Date violation determined: 02/28/1995
Date achieved compliance: 02/28/1997
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 06/21/1995
Enf. disposition status: Not reported

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/01/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: N/A

Number of Days to Update: 12	Next Scheduled EDR Contact: 07/22/2013
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/01/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: N/A

Number of Days to Update: 12	Next Scheduled EDR Contact: 07/22/2013
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/04/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: 703-412-9810

Number of Days to Update: 72	Next Scheduled EDR Contact: 07/22/2013
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/14/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/29/2013	Telephone: 703-603-0695
Date Made Active in Reports: 05/10/2013	Last EDR Contact: 03/11/2013
Number of Days to Update: 42	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/14/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/29/2013	Telephone: 703-603-0695

Number of Days to Update: 42	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 02/18/2013
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/03/2013
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/17/2013	Telephone: 202-267-2180
Date Made Active in Reports: 02/15/2013	Last EDR Contact: 04/02/2013
Number of Days to Update: 29	Next Scheduled EDR Contact: 07/15/2013
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

HSL: Hazardous Sites List

The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

Date of Government Version: 02/27/2013	Source: Department of Ecology
Date Data Arrived at EDR: 03/14/2013	Telephone: 360-407-7200
Date Made Active in Reports: 04/08/2013	Last EDR Contact: 03/12/2013
Number of Days to Update: 25	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 01/22/2013	Source: Department of Ecology
Date Data Arrived at EDR: 01/24/2013	Telephone: 360-407-7200
Date Made Active in Reports: 02/04/2013	Last EDR Contact: 04/26/2013
Number of Days to Update: 11	Next Scheduled EDR Contact: 08/05/2013
	Data Release Frequency: Semi-Annually

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/06/2012	Source: Department of Ecology
Date Data Arrived at EDR: 09/13/2012	Telephone: 360-407-6132

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action

The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

SEATTLE/KING COUNTY:

Seattle - King County Abandoned Landfill Toxicity / Hazard Assessment Project

This report presents the Seattle-King County Health Department's follow-up investigation of two city owned and four county owned abandoned landfills which was conducted from February to December 1986.

Date of Government Version: 12/31/1986
Date Data Arrived at EDR: 08/18/1995
Date Made Active in Reports: 09/20/1995
Number of Days to Update: 33

Source: Department of Public Health
Telephone: 206-296-4785

TACOMA/PIERCE COUNTY:

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

Date of Government Version: 09/01/2002
Date Data Arrived at EDR: 03/24/2003
Date Made Active in Reports: 05/14/2003
Number of Days to Update: 51

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/18/2013
Date Data Arrived at EDR: 02/18/2013
Date Made Active in Reports: 03/21/2013

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

USGS TOPOGRAPHIC MAP

Target Property Map:	47122-G3 EDMONDS EAST, WA
Most Recent Revision:	1981

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> SNOHOMISH, WA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
--	--

Flood Plain Panel at Target Property: Not Reported

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> EDMONDS EAST	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile East
Site Name:	LYNNWOOD PLATING INC
Site EPA ID Number:	WAD009488651
Groundwater Flow Direction:	E, WITH A DISCHARGE TO SWAMP CREEK
Inferred Depth to Water:	1.5 feet to 3 feet
Hydraulic Connection:	In places, the water table is seasonally perched from January to March. The site is underlain by approximately 190 feet of Vashon till. The Esperance sand aquifer underlies the Vashon till.
Sole Source Aquifer:	A sole source aquifer is not present at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

12	1/2 - 1 Mile West	S

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Alderwood

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
